

8 50961 Chapter 10, said conversion layer having a layer thickness  
9 of about 100 nm to 1000 nm, said conversion layer having across  
10 the conversion layer thickness a chromium content of greater than  
11 1% based upon zinc and chromium, said conversion layer having an  
12 average chromium content of more than approximately 5% based on  
13 zinc and chromium, said conversion layer having a chromium index  
14 greater than approximately 10, wherein the chromium index is  
15 defined as said average chromium content (chromium/(chromium +  
16 zinc)) in the layer greater than 1% Cr, multiplied by the layer  
17 thickness in nm.

1 ~~2.~~ 59. A conversion layer according to claim ~~58~~, wherein said  
2 conversion layer has a chromium-rich zone greater than  
3 approximately 20% chromium, based upon zinc and chromium in the  
4 conversion layer, of more than approximately 15 nm.

1 ~~3.~~ 60. A conversion layer according to claim ~~58~~, wherein said  
2 layer is transparent.

1 ~~4.~~ 61. A conversion layer according to claim ~~58~~, wherein said  
2 layer is clear.

1 ~~5.~~ 62. A conversion layer according to claim ~~58~~, wherein said  
2 layer is substantially colorless.

1 ~~6.~~ 63. A conversion layer according to claim ~~58~~, wherein said

2 layer is iridescent.

1 ~~7.~~ <sup>1</sup> 64. A conversion layer according to claim ~~58~~, wherein said  
2 layer presents multi-colored iridescence.

1 ~~8.~~ <sup>1</sup> 65. A conversion layer according to claim ~~58~~, wherein said  
2 layer is hard.

1 ~~9.~~ <sup>1</sup> 66. A conversion layer according to claim ~~58~~, wherein said  
2 layer is resistant to wiping.

1 ~~10.~~ <sup>1</sup> 67. A conversion layer according to claim ~~58~~, wherein said  
2 layer adheres well.

1 ~~11.~~ <sup>1</sup> 68. A conversion layer according to claim ~~58~~, wherein said  
2 layer contains, for further enhanced corrosion protection, one or  
3 more components selected from the group consisting of silicate,  
4 cerium, aluminum and borate.

1 ~~12.~~ <sup>1</sup> 69. A conversion layer according to claim ~~58~~, wherein said  
2 layer further comprises cobalt.

1 ~~13.~~ <sup>1</sup> 70. A conversion layer according to claim ~~58~~, wherein said  
2 layer further comprises one or more metal compounds selected from  
3 the group consisting of 1- to 6-valent metal compounds.

1 ~~14.~~ A conversion layer according to claim ~~58~~, wherein said  
2 layer further comprises one or more metal compounds selected from  
3 the group consisting of Na, Ag, Al, Co, Ni, Fe, Ga, In,  
4 Lanthanides, Zr, Sc, Ti, V, Cr, Mn, Cu, Zn, Y, Nb, Mo, Hf, Ta and  
5 W.

1 ~~15.~~ A conversion layer according to claim ~~58~~, wherein said  
2 layer further comprises one or more ions selected from the group  
3 consisting of anions.

*D/cont'd*  
1 ~~16.~~ ~~73.~~ A conversion layer according to claim ~~58~~, wherein said  
2 layer further comprises one or more ions selected from the group  
3 consisting of halide ions, sulfurous ions, nitrate ions,  
4 ~~phosphorus-containing ions~~  
4 ~~phosphorus ions~~, carboxylic acid anions and silicon-containing  
5 anions.

1 ~~17.~~ ~~74.~~ A conversion layer according to claim ~~58~~, wherein said  
2 layer further comprises one or more ions selected from the group  
3 consisting of chloride ions, sulfate ions, phosphate ions,  
4 diphosphate ions, linear and cyclic oligophosphate ions, linear  
5 and cyclic polyphosphate ions, hydrogen phosphate ions, and  
6 silicate anions.

1 ~~18.~~ ~~75.~~ A conversion layer according to claim ~~58~~, wherein said  
2 layer further comprises one or more materials selected from the  
3 group consisting of polymers, corrosion inhibitors, silicic

4 acids, surfactants, polyols, organic acids, amines, plastics  
5 dispersions, dyes, pigments, chromogenic agents, amino acids,  
6 siccatives, and dispersing agents.

1 ~~19~~ <sup>76.</sup> A conversion layer according to claim ~~58~~, wherein said  
2 layer further comprises one or more materials selected from the  
3 group consisting of organic polymers, colloidal or disperse  
4 silicic acids, diols, triols, monocarboxylic acids, carbon black,  
5 metal chromogenic agents, glycin, and cobalt siccatives.

1 ~~20~~ <sup>77.</sup> A conversion layer according to claim ~~58~~, wherein said  
2 layer further comprises one or more materials selected from the  
3 group consisting of dyes and color pigments.

1 ~~21~~ <sup>78.</sup> A method for producing a chromium(VI)-free conversion  
2 layer affording at least the corrosion protection of conventional  
3 chromium(VI)-containing yellow chromations, said method  
4 comprising the step of treating a metallic surface with a  
5 solution of at least one chromium(III) complex and at least one  
6 salt, wherein chromium(III) is present in said solution in a  
7 concentration of approx. 5 to 100 g/l; and said chromium(III)  
8 complex has ligand replacement kinetics more rapid than the  
9 fluoride replacement kinetics in chromium(III)-fluorocomplexes,  
10 said method producing a chromium(VI)-free conversion layer  
11 affording at least the corrosion protection of conventional  
12 chromium(VI)-containing yellow chromations.

1 ~~22~~ 80. A method according to claim ~~78~~, wherein said metallic  
2 surface is zinc or zinc alloy.

1 ~~23~~ 80. A method according to claim ~~78~~, wherein said metallic  
2 surface is zinc or zinc alloy with iron.

1 ~~24~~ 81. A method according to claim ~~78~~, wherein said treating  
2 is carried out at an elevated temperature.

1 ~~25~~ 82. A method according to claim ~~78~~, wherein said treating  
2 is carried out at a temperature of 20 to 100°C.

1 ~~26~~ 83. A method according to claim ~~78~~, wherein said treating  
2 is carried out at a temperature of 20 to 80°C.

1 ~~27~~ 84. A method according to claim ~~78~~, wherein said treating  
2 is carried out at a temperature of 30 to 60°C.

1 ~~28~~ 85. A method according to claim ~~78~~, wherein said treating  
2 is carried out at a temperature of 40 to 60°C.

1 ~~29~~ 86. A method according to claim ~~78~~, wherein said  
2 chromium(III) complex has chelate ligands which are selected from  
3 the group consisting of dicarboxylic acids, tricarboxylic acids,  
4 hydroxycarboxylic acids, acetylacetone, urea, urea derivatives,

5 mixtures thereof, among each other as well as in mixed complexes  
6 with inorganic anions and H<sub>2</sub>O.

1 ~~30.~~ 87. A method according to claim ~~78~~<sup>12</sup>, wherein said  
2 chromium(III) complex has chelate ligands which are selected from  
3 the group consisting of oxalic, malonic, succinic, glutaric,  
4 adipic, pimelic, suberic, azelaic and sebacic acids, mixtures  
5 thereof, and in mixed complexes with inorganic anions and H<sub>2</sub>O.

1 ~~31.~~ 88. A method according to claim ~~78~~<sup>12</sup>, wherein said  
2 chromium(III) complex has chelate ligands which are selected from  
3 the group consisting of maleic acid, phthalic acid, terephthalic  
4 acid, tartaric acid, citric acid, malic acid, ascorbic acid,  
5 mixtures thereof, and in mixed complexes with inorganic anions  
6 and H<sub>2</sub>O.

1 ~~32.~~ 89. A method according to claim ~~78~~<sup>12</sup>, wherein said  
2 chromium(III) complex has chelate ligands which are selected from  
3 the group consisting of malonic acid and malonic acid in mixed  
4 complexes with inorganic anions and H<sub>2</sub>O.

1 ~~33.~~ 90. A method according to claim ~~78~~<sup>12</sup>, wherein said method is  
2 performed repeatedly on said metallic surface.

1 ~~34.~~ 91. A method according to claim ~~78~~<sup>12</sup>, wherein said treating  
2 is carried out at a temperature of 20 to 100°C with rinsing water

3 recycling over at least 2 cascaded rinsing stages.

1 ~~35~~ <sup>34</sup> 92. A method according to claim ~~31~~, wherein a blue  
2 chromation is performed in one of the rinsing stages.

1 ~~36~~ <sup>32</sup> 93. A method according to claim ~~38~~, wherein said method  
2 includes an immersion period of between approx. 15 and 200  
3 seconds.

1 ~~37~~ <sup>32</sup> 94. A method according to claim ~~38~~, wherein said method  
2 includes an immersion period of between approx. 15 and 100  
3 seconds.

1 ~~38~~ <sup>32</sup> 95. A method according to claim ~~38~~, wherein said method  
2 includes an immersion period of approx. 30 seconds.

1 ~~39~~ <sup>32</sup> 96. A passivation bath for passivating a metal surface,  
2 said bath comprising chromium(III) in a concentration of approx.  
3 5 to 100 g/l, chromium(III) being present in said bath in the  
4 form of at least one chromium(III) complex having ligand  
5 replacement kinetics more rapid than the fluoride replacement  
6 kinetics in chromium(III)-fluorocomplexes, said bath  
7 substantially containing chromium(III) as a passivating  
8 component.

1 ~~40~~ <sup>32</sup> 97. A passivation bath according to claim ~~36~~, wherein said

2 metal surface is zinc or zinc alloy.

1 ~~41.~~ 98. A passivation bath according to claim ~~96~~, wherein said  
2 chromium(III) complex is selected from complexes with  
3 chromium(III) and at least one chelate ligand selected from the  
4 group consisting of dicarboxylic acids, tricarboxylic acids,  
5 hydroxycarboxylic acids, acetylacetone, urea, urea derivatives,  
6 mixtures thereof, among each other as well as in mixed complexes  
7 with inorganic anions and H<sub>2</sub>O.

1 ~~42.~~ 99. A passivation bath according to claim ~~96~~, wherein said  
2 chromium(III) complex is selected from complexes with  
3 chromium(III) and at least one chelate ligand selected from the  
4 group consisting of oxalic, malonic, succinic, glutaric, adipic,  
5 pimelic, suberic, azelaic and sebacic acids, mixtures thereof,  
6 and in mixed complexes with inorganic anions and H<sub>2</sub>O.

1 ~~43.~~ 100. A passivation bath according to claim ~~96~~, wherein said  
2 chromium(III) complex is selected from complexes with  
3 chromium(III) and at least one chelate ligand selected from the  
4 group consisting of maleic acid, phthalic acid, terephthalic  
5 acid, tartaric acid, citric acid, malic acid, ascorbic acid,  
6 mixtures thereof, and in mixed complexes with inorganic anions  
7 and H<sub>2</sub>O.

1 ~~44.~~ 101. A passivation bath according to claim ~~96~~, wherein said

2 chromium(III) complex is selected from complexes with  
3 chromium(III) and at least one chelate ligand selected from the  
4 group consisting of malonic acid and malonic acid in mixed  
5 complexes with inorganic anions and H<sub>2</sub>O.

1 ~~45~~ 102. A passivation bath according to claim ~~96~~ 39, wherein said  
2 bath further comprises one or more components selected from the  
3 group consisting of sealers, dewatering fluids, additional metal  
4 compounds, anions, polymers, corrosion inhibitors, silicic acids,  
5 surfactants, polyols, organic acids, amines, plastics  
6 dispersions, dyes, pigments, chromogenic agents, amino acids,  
7 siccatives and dispersing agents.

1 ~~46~~ 103. A passivation bath according to claim ~~96~~ 39, wherein said  
2 bath further comprises one or more components selected from the  
3 group consisting of 1- to 6-valent metal compounds, halide ions,  
4 sulfurous ions, nitrate ions, phosphoric ions, carboxylic acid  
5 anions, silicon-containing anions, organic polymers, colloidal or  
6 disperse silicic acids, diols, triols, monocarboxylic acids,  
7 carbon black, metallic chromogenic agents, glycin, and cobalt  
8 siccatives.

1 ~~47~~ 104. A passivation bath according to claim ~~96~~ 39, wherein said  
2 bath further comprises one or more components selected from the  
3 group consisting of metal compounds of Na, Ag, Al, Co, Ni, Fe,  
4 Ga, In, Lanthanides, Zr, Sc, Ti, V, Mn, Cu, Zn, Y, Nb, Mo, Hf, Ta

5 and W, chloride ions, sulfate ions, phosphate ions, diphosphate  
6 ions, linear and cyclic oligophosphate ions, linear and cyclic  
7 polyphosphate ions, hydrogen phosphate ions and silicate anions.

1 ~~48~~ <sup>39</sup> 105. A passivation bath according to claim ~~96~~, wherein  
2 chromium(III) is present in a concentration of approx. 5 g/l to  
3 80 g/l.

1 ~~49~~ <sup>39</sup> 106. A passivation bath according to claim ~~96~~, wherein  
2 chromium(III) is present in a concentration of approx. 5 g/l to  
3 60 g/l.

1 ~~50~~ <sup>39</sup> 107. A passivation bath according to claim ~~96~~, wherein  
2 chromium(III) is present in a concentration of approx. 10 g/l to  
3 30 g/l.

1 ~~51~~ <sup>39</sup> 108. A passivation bath according to claim ~~96~~, wherein  
2 chromium(III) is present in a concentration of approx. 20 g/l.

1 ~~52~~ <sup>39</sup> 109. A passivation bath according to claim ~~96~~, wherein said  
2 bath has a pH between approx. 1.5 and 3.

1 ~~53~~ <sup>39</sup> 110. A passivation bath according to claim ~~96~~, wherein said  
2 bath contains approx. 20 g/l chromium(III) and has a pH of  
3 approx. 2 to 2.5.

1 ~~54~~ 11. A passivation bath according to claim ~~96~~ <sup>139</sup>, wherein said  
2 bath has a bath temperature of approx. 20 to 100°C.

1 ~~55~~ 11. A passivation bath according to claim ~~96~~, wherein said  
2 bath has a bath temperature of approx. 20 to 80°C.

1 ~~56~~ 11. A passivation bath according to claim ~~96~~, wherein said  
2 bath has a bath temperature of approx. 30 to 60°C.

1 ~~57~~ 11. A passivation bath according to claim ~~96~~, wherein said  
2 bath has a bath temperature of approx. 40 to 60°C.

1 ~~58~~ 11. A concentrate for producing a passivation solution for  
2 passivating a metal surface, said concentrate substantially  
3 containing chromium(III) for a passivating component, wherein  
4 said chromium(III) is present in the form of at least one complex  
5 having ligand replacement kinetics more rapid than the fluoride  
6 replacement kinetics in chromium(III)-fluorocomplexes.

1 ~~59~~ 11. A concentrate according to claim ~~115~~, wherein said  
2 concentrate is present in liquid form.

1 ~~60~~ 11. A concentrate according to claim ~~115~~, wherein said  
2 concentrate is present in solid form.

1 ~~61~~ 11. A concentrate according to claim ~~115~~, wherein said
